

PALWRAPP PALLETISER

PALWRAPP is the new range of compact and modular palletisers manufactured by Robopac. PALWRAPP palletisers feature extreme flexibility, safety and user friendliness hence representing mission-critical components for automated end-of-lines designed for Food as well as Consumer Packaged Goods. Based on Robopac technology, PALWRAPP palletising is reliable as well as energy efficient.

Modular units:

PALWRAPP equipment groups share common functional modules and frames providing comprehensive palletiser solutions. Shared modules maximize layout flexibility while reducing costs through increased manufacturing and machine controls efficiencies. Modular engineering means quality control and complete flexibility in the configuration of machine components.

Controls architecture is based on "Full B&R". Operations interface is provided by a User friendly touchscreen panel (10,1").

SPEED: FROM 1 TO 3 LAYERS/MIN

PROCESSED PRODUCTS:
